

Task Manager API — New Endpoints

Al Maghreb RD · Generated 2026-07-28 05:24 +03 · Base URL: <https://task.almaghrerb.com:8890>

Overview

This document describes the new REST API endpoints added for external integrations. All endpoints live under `/api/v1/`.

Setting	Value
Authentication	X-Api-Key: {API_KEY} or Authorization: Bearer {API_KEY}
Rate limit	60 requests / minute
System sender / issuer	TASKS_SYSTEM_ISSUER_ADMIN_ID in .env (admin shown as DM sender and task issuer)
Postman collection	postman/Task-Manager-API.postman_collection.json

Endpoint Summary

Method	Path	Description
GET	/api/v1/quality-control	List QC visits (filter by vendon_id, date, etc.)
GET	/api/v1/quality-control/{id}	QC visit detail
POST	/api/v1/tasks/urgent-operator	Create urgent operator task
POST	/api/v1/direct-messages	Send system DM to user
POST	/api/v1/notifications/cleaning-overdue	Deliver cleaning-overdue DM

GET

Quality Control Visits

/api/v1/quality-control

Lists quality control visit incidents recorded in admin/company Quality Control pages.

Query parameters

Param	Required	Notes
vendon_id	No	Filter by Vendon cloud machine ID
date	No	Exact visit date (YYYY-MM-DD)
from / until	No	Date range — use together, not with date
operator_user_id	No	Filter by operator user ID
incident_type	No	hazard, cleanliness, presentation, electrical, technical, stockout, customer
result	No	pass or not_pass
issue_status	No	resolved or unresolved
search	No	Match issue text, recommendations, or machine
all	No	true = return all matches without pagination
per_page, page	No	Pagination (default 25 per page)

Example

```
GET https://task.almaghrrerb.com:8890/api/v1/quality-control?vendon_id=325250&all=true
X-Api-Key: YOUR_KEY
Accept: application/json
```

Response fields (each visit)

- **date** — visit date
- **visitor** — QC inspector (type, id, name)
- **machine** — id, name, vendon_id
- **operator** — assigned operator on visit
- **incident_type, issue_detected, result, issue_status**
- **recommendations, attachment, recorded_at, updated_at**

GET

/api/v1/quality-control/{id}

Returns full detail for one QC visit by internal ID.

POST

Urgent Operator Task

/api/v1/tasks/urgent-operator

Creates an urgent task assigned to a company user. Appears in **Company → Tasks → Received tasks**.

Request body

Field	Required	Notes
title	Yes	Task title
user_id	Yes	Operator (assignee) user ID
message	Yes	Main explanation text
machine_id	One of	Internal vendon_machines.id
vendon_id	One of	Vendon cloud machine ID
due_time	No	H:i — appended to explanation
start_date	Yes	YYYY-MM-DD
end_date	Yes	YYYY-MM-DD, ≥ start_date
attachment	No	File — use multipart/form-data

Department and position are auto-filled from the operator's linked positions.

Example (JSON)

```
POST https://task.almaghrerb.com:8890/api/v1/tasks/urgent-operator
Content-Type: application/json
X-API-Key: YOUR_KEY

{
  "title": "Restock urgently",
  "user_id": 50,
  "vendon_id": 325250,
  "message": "Refill cups and verify coin mech.",
  "due_time": "18:30",
  "start_date": "2026-07-28",
  "end_date": "2026-07-28"
}
```

Response: 201 Created — task JSON with assignee, department, position, issued_by.

POST

Direct Message

/api/v1/direct-messages

Sends a global direct message to a company user's DM inbox. Sender is the system admin from TASKS_SYSTEM_ISSUER_ADMIN_ID.

Request body

Field	Required	Notes
user_id	Yes	Recipient user ID
message	One of	Text body (max 10,000 chars)
attachment	One of	Image, video, PDF, office docs, zip

Example

```
POST https://task.almaghrrerb.com:8890/api/v1/direct-messages
Content-Type: application/json
X-API-Key: YOUR_KEY

{
  "user_id": 50,
  "message": "Please confirm machine 325250 is restocked."
}
```

Response: 201 Created — sender, recipient, body, optional attachment.

POST

Cleaning-Overdue Notification

/api/v1/notifications/cleaning-overdue

Delivers a cleaning-overdue message to the operator's DM inbox using the system admin sender.

Request body

Field	Required	Notes
user_id	Yes	Recipient operator user ID
machine_id	One of	Internal vendon_machines.id
vendon_id	One of	Vendon cloud machine ID
overdue_date	No	YYYY-MM-DD — defaults to today (app timezone)
message	No	Custom body; default template if omitted

Default message template

```
Cleaning overdue

Machine: {name} (Vendon ID {vendon_id})
Date: {overdue_date}

Daily cleaning was not completed for this machine.
Please open the machine channel and submit your cleaning video as soon as possible.
```

Example

```
POST https://task.almaghrrerb.com:8890/api/v1/notifications/cleaning-overdue
Content-Type: application/json
X-API-Key: YOUR_KEY

{
  "user_id": 50,
  "vendon_id": 325250,
  "overdue_date": "2026-07-28"
}
```

Response: 201 Created — notification_type, overdue_date, machine, direct_message.

Error Responses

HTTP	Meaning
401	Missing or invalid API key
422	Validation error (invalid fields, missing machine reference, etc.)
429	Rate limit exceeded (60/min)
